

# Louvered Curbs

## NOTES

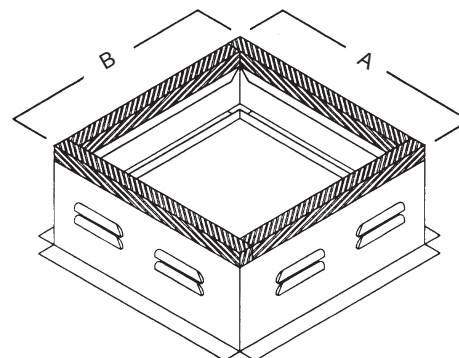

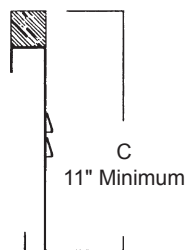

All curb models are available with louvered vents. Louvered vents are 6"W x 7/8"H, spaced at 1/2" with 4 louvers per side. Free area per louver is 1 1/2 sq.in. Curb models with insulation as standard will not be insulated to eliminate interference with the airflow through the louvered vent. If either dimension exceeds 90", multi-section construction may be required.
